## Unit ball bearing tolerances (JIS B 1558)

### 1. Inner ring tolerances.

Unit:  $\mu\text{m}/0.0001$  inch

Nominal bore diameter <i>d</i>				Bore diameter			Width		Radial runout (ref.)
over		incl.		$\Delta d_{mp}$ Deviations		$\Delta V_{dp}$ Variations	$\Delta B_s$ Deviations (ref.)

				+8	0	6	0	-47	8

$\Delta d_{mp}$ ; Mean bore diameter deviation.  $\Delta V_{dp}$ ; Bore diameter variation.  
 $\Delta B_s$ ; Inner ring width deviation.

### 2. Outer ring tolerances. Unit: $\mu\text{m}/0.0001$ inch

Nominal outside diameter <i>D</i>				$\Delta D_m$ Deviations		Radial runout (ref.)
over		incl.		high	low	
mm	inch	mm	inch

The low deviation of outside diameter  $\Delta D_m$  does not apply within the distance of 1/4 the width of the outer ring from the side.

## This new series from NTN provides corrosion resistance and longer lubrication life in a clean unit with low torque characteristics.

### 1. Features

#### Guards against corrosion

NTN bearing units in the stainless series feature ball bearings inserted into housings made of stainless that provide superior resistance to corrosion as compared to standard series cast iron units. This series is especially useful in a wide variety of applications because of the rust free properties of the housing.

#### Longer lubrication life

The solid grease lubricating the bearing has been heat-hardened and is a mixture of lubricant and ultra high molecular weight polyethylene. The solid grease reduces leakage, prolonging lubricant life especially when used under conditions of vibration or centrifugal force. Also, this grease will not homogenize when water penetrates into the bearing raceway.

#### Maintains a clean operating environment

The solid grease lubricant in the ball bearing, solely developed by NTN, reduces leakage from the bearing, significantly reducing environmental pollution.

#### Low torque characteristics

The standard solid grease type for these ball bearing units is spot-pack which places the lubricant on the bearing retainer. Torque consumption capabilities of spot-pack bearings is low due to reduced whip resistance in comparison to standard grease lubricated ball bearings.

#### Interchangeability

The basic dimensions are the same as current NTN units and are also compatible with units from other manufacturers ISO standard.

### 2. Materials

Parts		Materials
Bearing	Raceways	Martensite stainless steel (equivalent to SUS440C)
	Rolling element	Martensite stainless steel (SUS440C)
	Slinger, Retainer	Austenite stainless steel (SUS304)
	Rubber seal	Nitril rubber
	Set screw (W shape screw head)	Martensite stainless steel (SUS410)
Bearing housing		Austenite stainless steel casting (SCS13)

### 3. Recommended operating temperature and allowable speed

Bearings with solid grease are recommended to operate under  $-20$  to  $+80^{\circ}\text{C}$ . However, operating temperature should be below  $+60^{\circ}\text{C}$  when the bearing is operated under continuous use.

$dn$  value :  $12 \times 10^4$  max  
( $dn$ =bore diameter in mm $\times$ speed in rpm)

**Remarks:** This recommended operating temperature range and allowable speed is applied to all bearings with solid grease. Contact NTN when your application exceeds these recommendations.

### 4. Anti-Corrosion

NTN recommends ratings of ◎ to ○ for optimum corrosion resistance. ◎ ← excellent → poor

Materials	Condition	Atmosphere		Water		Acid		
		Dry	Wet	Natural water	Sodium water	Nitric acid	Sulfuric acid	Hydrochloric acid
Martensite stainless steel JIS.SUS440C, JIS.SUS410		○	△	△	▲	▲	×	×
Austenite stainless steel JIS.SUS304, JIS.SCS13		◎	◎	◎	○	◎	○	△
High carbon steel JIS.SUJ2		△	▲	▲	×	×	×	×
Carbon steel, Cast iron		▲	×	×	×	×	×	×

**Remarks:** This data is obtained by observation of the surface conditions of materials. Note that these anti-corrosion capabilities are altered by anti-corrosion surface treatment. Not recommended for use in liquid.

### 5. Applications

Bearings with solid grease are suitable in applications requiring a clean operating environment such as : food processing and packaging machinery, chemical processing machines, etc.

### 6. Option

The stainless series can also be filled with special grease, i. e., food processing grade, high temperature grease, etc. Also, a grease nipple can be applied upon request. Contact NTN for additional information.
